

IN THE CLAIMS:

The claims, including amendments, are listed below.

1. (Currently Amended) Magnet ~~unit (1)~~ arrangement for the fastening of a concrete mould side to a casting bed, ~~characterised by the unit having comprising:~~
a magnet unit having a body having at least one front face (8) ~~with and~~ a downwardly facing wedge profile (7) recess for fitting to a counter receiving an upwardly facing wedge profile in the on a mould side, and ~~an immovably fixed a magnet (6) fixed in the body~~ for attaching the unit to a metallic casting bed ; and
a detaching tool for tilting the body relative to the casting bed about an axis substantially perpendicular to the front face.

2. (Currently Amended) Magnet ~~unit (10)~~ arrangement according to claim 1, ~~characterised by having comprising~~ two faces provided with wedge profiles for fitting to counter wedge surfaces on two ~~separate~~ mould side units.

3. (Currently Amended) Magnet ~~unit~~ arrangement according to claim 2, ~~characterised by wherein the faces being are~~ on opposite sides of the magnet unit.

4. (Currently Amended) Magnet ~~unit~~ arrangement according to claim 1, ~~characterised by having comprising~~ a slot for receiving a at least a portion of the detaching tool in at least one surface not having a wedge ~~profile~~ recess.

5. (Currently Amended) Magnet ~~unit~~ arrangement according to claim 2,
~~characterised by having~~ comprising a slot for receiving a at least a portion of the detaching
tool in at least one surface not having a wedge ~~profile~~ recess.

6. (Currently Amended) Magnet ~~unit~~ arrangement according to claim 3,
~~characterised by having~~ comprising a slot for receiving a at least a portion of the detaching
tool in at least one surface not having a wedge ~~profile~~ recess.
